

A project of the Rotary
Club of Eltham
District 9790

National Commission for Human Development

Aquabox (Australia) is a sister project to Aquabox in the UK. Both are projects of Rotary International. 108 Aquaboxes arrived at Islamabad International Airport (via Bangkok) on Thai Airways on Monday the 20th September for distribution amongst the flood affectees in NCHD managed Relief Camps with the involvement of the Rotary club's local chapter. Rotary Club had been very keen to form a partnership with an organization such as NCHD which has the capability to properly distribute the 108 Aquaboxes Gold which had been ready for shipment to the disaster areas of Pakistan to victims of the floods. Each Aquabox contains sufficient carbon filters and sterilizing tablets to produce 2000 liters of clean water from water contaminated by the floods. Each box also contains a range of humanitarian aid such as tarpaulin, rope, blankets, eating utensils etc.

National Commission for Human Development's Flood Relief Operation, initiating from evacuating people, has now transformed in a more focused way by establishing a Tent Village in each disaster hit district. Each Tent Village accommodates at least 100 families in it, as these families are not only homeless but, due the continuous rains and rising rivers, can not return to their villages. The Aqua Boxes donated by the Rotary Club will be distributed amongst these families. It is also worth mentioning that NCHD has already distributed 57 aqua Boxes in collaboration with Humanity First Pakistan in Khyber Pakhtunkhwa Province and has the ability, expertise, infrastructure and essential manpower to distribute Aqua Boxes anywhere in Pakistan. NCHD took the responsibility for custom clearance, transportation, handling and distribution of aqua boxes.

Aquabox Contents

- 2 Plastic Buckets
- 4 Melamine Bowls
- 4 Melamine Plates (large)
- 4 Melamine Plate (small)
- 4 Melamine Mugs
- 1 Cast Iron Pan
