

NCHD SWAT

A married couple from Bahrain, Swat made it to the NCHD Rubicon Medical Camp with their newly born baby. After initial check up of the baby, the mother told NCHD doctor that her baby feeds on artificial milk.

“We have lost our house and our cattle during these recent floods - our only properties which we had. Now we have nothing with which to purchase milk for our baby. And our baby is hungry since morning as he has had nothing to eat”, says the father.

NCHD Swat team had special supplement-powder milk for infants, which the Chairperson NCHD, Ms. Nafisa Shah had brought with her through Bait-ul-Mall on her visit to Swat.

On prescription of the doctor, milk was provided for the baby from NCHD Pharmacy.

The relieved parents left Rubicon Medical Camp praying warmly for the NCHD Swat Team.
